Data Collection Processing, Exploitation, and Dissemination (PED)

AirTronic provides industry leading imagery collection and data analysis services, using highly trained analysts to support organizations that require comprehensive Processing, Exploitation, and Dissemination (PED) of data gathered. Utilizing several forms of intelligence gathering disciplines, modeled after our military intelligence gathering processes, we utilize every available source to provide a complete brief to the end-use. Our analysts digest large volumes of information, coming at a rapid rate, from a variety of collection sources, covering both time and space. By developing point analysis and conducting pattern of life examination, AirTronic analysts assist in data capture and discovery while conducting real-time assessment and detailed explanation
